

DIAMONDSTEP

The stair-edging profile with Diamondtred safety inlays

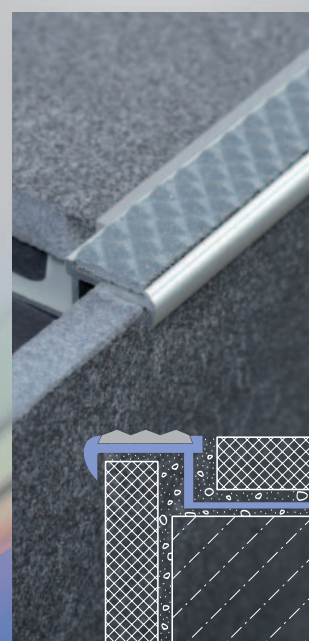

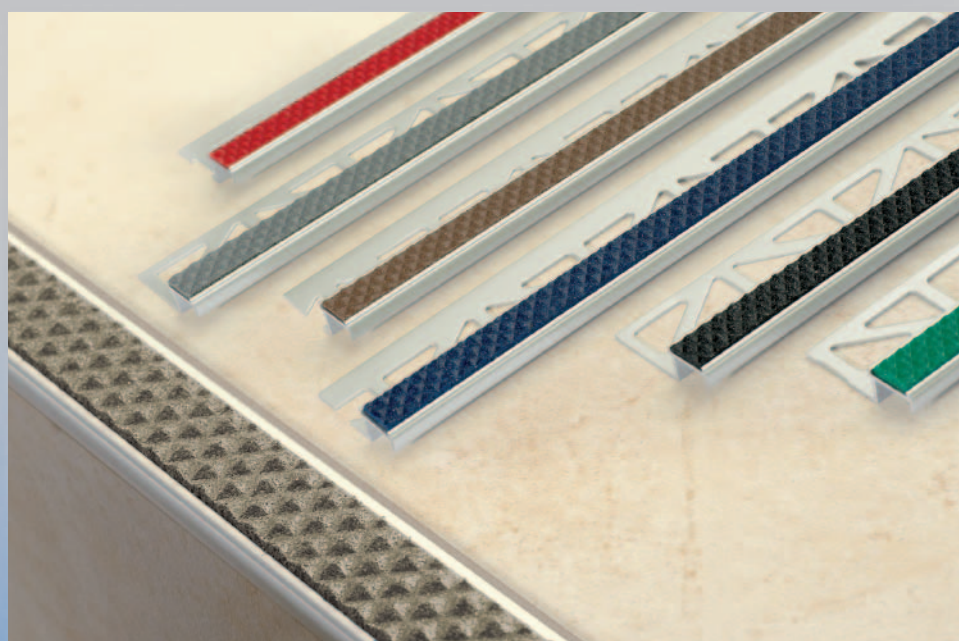

Bring more style to your steps

Aluminium stair-edging profile, optionally for inserting the 13 mm wide non-slip Diamondtred safety yourself, or supplied complete with the inlay in 5 ▲ top selling colours. Diamondtred safety inlay with self-adhesive backing in 16 bright and pastel colours for indoor and outdoor use.

For your staircase projects, use DIAMONDSTEP in the same tone as the flooring or choose a creative mix of colours – the possibilities are endless!

The front profile of DIAMONDSTEP neatly conceals any unsightly cutting edges – ideal, too, for polished granite steps up to a thickness of 13.5 mm.

DIAMONDSTEP

The stair-edging profile with Diamondtred safety inlays

Bring more safety to your steps

DURAL

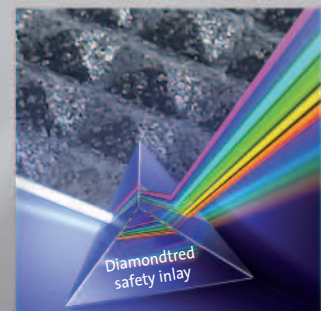

With its reliable non-slip properties and high long-term resilience, DIAMONDSTEP proves its worth on staircases both in the public and private domain. With its extremely flexible colour scheme and stylish aluminium finish, it enhances the appearance and safety of every staircase. DIAMONDSTEP is extremely effective at protecting step edges and flooring against mechanical loads.

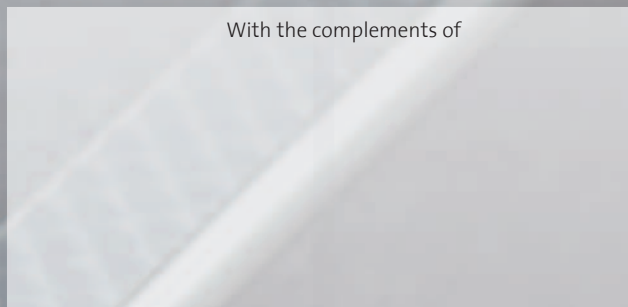

Diamondtred non-slip inlays with their range of safety and bright colours are exceptionally easy to use and extremely stylish. Used indoors, the special luminescent "116 nightglow" is a safety-enhancing colour which proves its mettle in sudden blackouts after a power cut. The "117 super nightglow" has an extremely long after-glow time thanks to the use of synthetic pigments and is equally suitable for indoors and out.

Advantages of DIAMONDSTEP:

- › Inlays replaceable
- › For all tiled and natural stone staircases and edges
- › High-quality anodised aluminium base profiles
- › Conceals unsightly cutting edges
- › Inlay surface with high slip resistance: R 10 · V4
- › Effective protection against mechanical loads
- › Special night-glow inlay colours
