

Transition profiles to adjust different heights in wood

with grooves

without grooves

Application:

DURATRANS WOOD is a wooden transition profile for edging at junctions and compensating for height differences in tiled floors. It protects the edges of the tiles from becoming damaged. The visible wooden surface gives the room a touch of Mediterranean flair.

Material:

oak (without grooves or with grooves)

Width:

Visible width 45 / 50 / 60 mm

Height:

11 / 13,5 / 16 / 22 mm

Length:

250 cm
